product line or dabble in all," he added.

To date, QNet Malaysia offers products throughout several specialised product categories. It also conducts regular product trainings, with the main objective to educate and empower IRs with the knowledge that they need.

"The experienced product training team helps facilitate and conduct product training presentations to create a better and more effective method of communication for the network to conduct their business and promote their products," said Navaratnam.

"The year 2010 has been heavy with new products. That means more opportunities and business offerings for IRs and more choice and product variety for customers. We believe that having the proper support is a stepping stone to success."

From online and physical support centres, one-on-one interaction and wide-scale events to marketing materials, business tools and industry-standard publications, QNet Malaysia is firm in its commitment to equip its IRs with everything they need to conduct their business correctly and successfully.

QNet Malaysia commenced operations from its Kuching office on Thursday, its first outside the Klang Valley. The office would also serve as its logistics hub for shipment of its products in East Malaysia.

"One of our best selling energy products is the Himalayan crystal collections of necklace series. Besides being the purest quartz crystal in the world, it also possesses the highest and most rare form of conducting and transferring energy to its wearer," said the operation manager.

She further pointed out that the Himalayan crystals replicated the exact triangular precision to recreate and harness the natural energy of the crystal to its full potential. It was embraced by 925-grade sterling silver with five micron rhodium plating.

In addition, the company also offered a range of energised titanium performance pendants designed for high-level athletes and active sportspeople.

"The fundamental criteria for QNet Malaysia's product selection are innovation, having a unique selling proposition, fitting into the philosophy of the company, quality levels and most importantly, each product must fulfill a need and be something that customers want to purchase for themselves or others," said Navaratnam.

"In addition to thorough research and development, having a good range of products offers independent representatives (IRs) alternatives in building their business. It ensures IRs and customers have the option to specialise in either a single

continuously and more efficiently," said QNet Malaysia operations manager Venie Kandiah.

Ole, known as olive leaf extract has five times more antioxidant power than Vitamin C. Ole was traditionally used to help treat fevers, cold and flu, common coughs and asthma. It helps maintain a healthy cardiovascular system and assist in the maintenance of normal heart function.

"Ole contains considerably higher concentrations of phenolic compounds of up to 40 times greater. Compared with mangosteen juice, it contains more than 500 per cent of total antioxidant capacity," Kandiah explained.

On the other hand, QNet Malaysia also has technology breakthrough energy products, such as the Bernhard M Mayer energy series of luxury watches as well as Amezcua Bio Disc, technically engineered natural minerals bonded in glass using high heat fusion methods.

POWERFUL COMBATANT: The growers of Ole's fresh olive leaves tested 60 different olive varieties from 12 countries to identify the variety that is most suited to fresh leaf extract production.

"The best part is it utilises the unique SilverSol Technology that is scientifically proven and exclusively patented. The product is manufactured under an exclusive US patent featuring the power of engineered nanosilver," Navaratnam explained.

SilverSol Technology is a newly-patented technology that

uses a high level of alternative current to manufacture super-charged silver solutions with more benefits at a much lower concentration of silver minus five to 40 parts per million.

"It features an engineered nanoparticle with specific size and resonance, allowing a single silver particle to neutralise bacteria

KUCHING: Global direct selling company QNet (M) Sdn Bhd (QNet (M)) is continually developing new ranges of products, marking the natural evolution of its product offerings from high-quality to well researched consumer goods.

"Through stringent quality controls and working with top researchers, scientists and manufacturing facilities in each field, we offer a wide range of lifestyle products, including wellness and energy, personal care, nutrition supplement, telecommunications as well as luxury watches," said its general manager V Navaratnam.

Among all the personal care products that QNet Malaysia offered, he pointed out that some of the best sellers were BioSilver 22 and Ole.

BioSilver 22 is a clear, odourless, non-greasy gel that provides thorough cleansing and sanitising of the hands and body.
